## IT IS CHRISTMES EVE TODAY

Some people believe that on the far side of the sun there is a duplicate copy of the earth, but in reverse. Even though you m may not believe in this theory, there is some general proof. As was recently pointed out to us by Professor Eric Von Stup, "At certain times of the year there are polarities that reverse peoples actions. This is very noticible on July 24th. , which is the opposite polarity synconization of Christmas. During this time of the year many people show signs of the Christmas Spirit."

Keeping Von Stup's theory in mind, we ask that all scout try to control this overwelming urge to be cheerful and joyous. Try to control your urge to do good things for other people', and above all else remember that health and safty regulations state that "No more than five hours a day will be spent in the singing of Christmas Carols; due to the strain on the throat.

The one Christmas spirited item we do encourage is that every scout hang a sock up tonight before they go to bed. I you are lucky you may receive something in it; but at the same time it will air your sock out.
