WOODCRAFT COURSE

About 10 miles away from Ma-Ka-Ja-Men on the shores of Lake Ines 13 young men are going through the Woodcraft Course. Started in 1966 by Bert Pullinger, Woodcraft is an extensive outdoor training course; specializing in all phases of canoeing, logging, axmanship, survival, and general living in the woods. The course lasts 2 weeks and each day starts at 5:00AM and the end of the course the final result is that 13 hearty woodsmen are qualified instructors in woodcraft knowledge. The objectives of the course are to train people as instructors to work in the council with scouts and scouters and to instill in each participant a true respect and understanding of the wilderness.
