Got your boots and raincoats on? Got your umbrella handy? You might just need them today. It is supposed to rain on and off all day, so be prepared. Oh, by the way--if there is a lull in a conversation you might be engaged in today, here is an interesting bit of information: Ivory Soap is 100 years old this month. You know--the soap that floats--the funny thing is that the floating part of it was all a mistake. A workman left a certain machine running while he went to lunch, and the result was a batch of soap that was thought to be ruined. But, before too long, Ivory was getting all sorts of requests for the "floating soap". And, after 100 years, Ivory is still floating along. Which all goes to prove, everybody makes mistakes--and alot of times they are better than if things had been done right. So, if you goof once in awhile, don't worry!!
